---

### Objective

Engineering student and athlete passionate about stock market analysis, automation, and self-driving technology. Seeking opportunities to apply technical and analytical skills to real-world challenges.

---

### Education

#### University of Colorado Boulder

- *Major:* Electrical and Mechanical Engineering
  - *Minor:* Computer Science and Space
- 

### Skills

- **Programming:** Python, C++, C, Web Development
  - **Stock Market Analysis:** Word correlation tracking for market trends
  - **Automation:** Self-driving vehicle technology
  - **Software Development:** API development, UI design
  - **Version Control:** Git, GitHub (learning)
  - **Athletic Skills:** Discipline, teamwork, and perseverance
- 

### Projects

- **Stock Market Analysis Software** – Tracking historical news data and word correlation to identify market trends.
- **Self-Driving Vehicle Automation** – Exploring computer vision applications for autonomous systems.

---

### **Athletic Involvement**

- Competitive athlete with strong discipline, teamwork, and perseverance.

### **Languages**

- **Spanish** – Native
- **English** – Native
- **Italian** – Native
